

TOURNAIRE
Taking care of the essentials

T802 - T835

One-piece aluminum cans, 100% recyclable, designed for sterile pharmaceutical products (APIs, excipients).
Their chlorobutyl closure, crimped with an aluminum cap, ensures optimal tightness.

2,5 L

5,5 L

6,5 L

12,5 L

20 L

25 L

29,5 L

Closure

- Pharmaceutical-grade chlorobutyl stopper;
- For T802, internal neck diameter: 101 mm;
- For T835, internal neck diameter: 135 mm;
- Stopper secured by an aluminum cap crimped onto the cans.

Uses

Ideal for the storage and transport of bulk pharmaceutical ingredients, in solid granular form, requiring a highly tight and sterilizable packaging solution with long-term stability.

Pharmaceutical

Certifications

100% recyclable.

UN certified for the transport of hazardous solids for the T802 25 L model.

DMF

A Drug Master File (DMF) is registered with the Food and Drug Administration (FDA) in the United States and with the Chinese authorities.

THE BENEFITS OF THE RANGE

TIGHTNESS

- The precise finish of the sealing surface ensures optimal contact with the chlorobutyl stopper, a material known for its very low permeability.
- The crimped aluminum cap applies uniform pressure, reinforcing tightness and eliminating any risk of leakage or contamination.

COMPATIBILITY

- Made from pure aluminum, compliant with pharmaceutical-grade requirements, the cans benefit from an anodization treatment that enhances their inertness and stabilizes the surface, ensuring chemical stability of the contents and compliance with pharmaceutical standards.

CLEANLINESS

- Intensive washing and protective anodization of the can surface.
- Inspection and individual bagging ensure control of chemical, particulate and microbiological contamination prior to use.
- Stoppers are supplied ready for sterilization.

REGULATORY

- Compliant with pharmaceutical regulatory requirements.
- A Drug Master File registered with the Food and Drug Administration (United States) and a Chinese Drug Master File registered with the Chinese authorities.

SAFETY

- The crimped aluminum cap prevents accidental opening, ensuring tamper-evidence for APIs.

SUSTAINABILITY

- Can made entirely from pure aluminum 100% recyclable.
- The recyclability of containers that have been in contact with pharmaceutical products may vary depending on local regulations.

OUR CUSTOMIZATION OPTIONS

OPTIONS AND FINISHES

Available in an anodized finish with a 2 µm or 5 µm protective layer, and in plain aluminum upon request.

CUSTOMIZATION

Customization options are available upon request.
